

Problem	Solution	AWS Service
Need immutable customer records in S3 for 7 years, even root cannot delete	Enable S3 Object Lock in compliance mode	Amazon S3
Detect PII in S3 datasets before sharing with partners, minimal manual work	Use Amazon Macie automated sensitive data discovery	Amazon Macie
Multiple teams need to use S3 data but must not access PII	Run Amazon Macie discovery jobs to classify PII	Amazon Macie
Need notifications when users violate S3 access policies, including username	Enable CloudTrail data events, forward to CloudWatch for alarms	AWS CloudTrail, Amazon CloudWatch
Return 10 most recent CloudTrail events with error codes since a date	Query CloudTrail logs filtering errorcode IS NOT NULL, order by event time	AWS CloudTrail
Some S3 order summaries contain PII, need automated detection/redaction	Use Amazon Macie to classify and detect PII	Amazon Macie
100+ Redshift users access via IAM roles, need role-based access control	Use Role-Based Access Control (RBAC)	Amazon Redshift
JSON file has PII and non-PII, restrict PII access to limited group	Use AWS Lake Formation with column/row-level permissions	AWS Lake Formation
Create cross-Region snapshot copies for KMS-encrypted Redshift cluster	Enable snapshot copy and use snapshot copy grant in destination Region	Amazon Redshift, AWS KMS
Glue crawler fails with “S3 location not registered” under Lake Formation	Register the S3 path in Lake Formation and grant permissions	AWS Glue, AWS Lake Formation
Glue jobs and RDS in same SG lost connectivity after rule change	Add inbound rule allowing all TCP from same SG (self-reference)	Amazon RDS, AWS Glue

AWS DEA-Cor: Exam Cheat Sheet

Apps need to redact PII dynamically when reading from S3	Use S3 Object Lambda with Lambda redaction logic	Amazon S3, AWS Lambda
SageMaker Studio access denied when using Glue interactive sessions	Allow sts:AssumeRole for Glue and SageMaker service principals	Amazon SageMaker, AWS Glue
QuickSight dashboard over Athena/S3 fails with insufficient permissions	Grant QuickSight access to S3 and KMS decrypt permissions	Amazon QuickSight, Amazon Athena, AWS KMS
Protect sensitive S3 objects with encryption, only specific employees access keys	Use SSE-KMS and restrict access with key policies	Amazon S3, AWS KMS
Petabytes in S3, unpredictable access, must keep ms retrieval for all data	Enable S3 Intelligent-Tiering with default access tiers	Amazon S3
Glue job has hardcoded Redshift credentials	Store credentials in AWS Secrets Manager and grant Glue access	AWS Secrets Manager, AWS Glue, Amazon Redshift
Multiple groups need access to raw S3 data but only specific PII exposure	Use Athena with Lake Formation row/column filters	Amazon Athena, AWS Lake Formation
Provide row- and column-level controls for S3 queries in Athena/Redshift/EMR	Use Lake Formation with LF-tag policies and filters	AWS Lake Formation
Record all write operations to an S3 bucket into another S3 bucket	Enable CloudTrail data events (write-only) with destination bucket	AWS CloudTrail, Amazon S3
Analysts in multiple countries must access only their own country's data in S3	Register S3 in Lake Formation and enforce row-level security	AWS Lake Formation
Implement a data mesh with centralized governance and access control	Use S3 for storage, Glue for catalog/ETL, Athena for queries, Lake Formation for governance	Amazon S3, AWS Glue, Amazon Athena, AWS Lake Formation
Lambda must access RDS in private subnet without internet	Run Lambda inside VPC/subnet and update RDS SG to allow it	AWS Lambda, Amazon RDS

AWS DEA-Cor: Exam Cheat Sheet

For ALL available pdf's, visit - <https://tinyurl.com/buy-exam-pdf>

For ALL Analysis Videos, visit - patreon.com/sthithapragna

HR teams in different Regions must see only their own Region's employee data	Register S3 in Lake Formation and use Region-based row filters	AWS Lake Formation
Detect personally identifiable information (PII) in S3 datasets with minimal effort	Use Amazon Macie sensitive data discovery	Amazon Macie
Enable TLS in transit and KMS at rest for EMR cluster	Configure TLS certificates and specify KMS key during cluster creation	Amazon EMR, AWS KMS
After 30 days, S3 data becomes infrequently accessed; optimize cost	Use S3 Lifecycle rule to transition to Standard-IA after 30 days	Amazon S3
Automate PII discovery in order summaries stored in S3	Use Amazon Macie discovery jobs	Amazon Macie
Ensure multi-team access to S3 data without exposing PII	Use Lake Formation with fine-grained permissions	AWS Lake Formation
Get alerts when S3 policy violations occur with user details	Enable CloudTrail data events and CloudWatch alarms	AWS CloudTrail, Amazon CloudWatch
Redshift cluster snapshots must be copied across Regions with KMS encryption	Create snapshot copy grant in destination Region and enable snapshot copy	Amazon Redshift, AWS KMS
Glue crawler fails with Lake Formation-governed S3 path	Register S3 location in Lake Formation	AWS Glue, AWS Lake Formation
Secure Redshift access for hundreds of users with different roles	Use Redshift Role-Based Access Control (RBAC)	Amazon Redshift
Store and secure credentials for Glue jobs accessing Redshift	Use AWS Secrets Manager to store credentials, access via IAM role	AWS Secrets Manager, AWS Glue
Multiple teams reading sensitive JSON in S3, restrict PII exposure	Use Lake Formation column/row-level permissions	AWS Lake Formation
Create a data mesh with governance and central access control	Use S3 + Glue + Athena + Lake Formation	Amazon S3, AWS Glue, Amazon Athena, AWS Lake Formation

AWS DEA-Cor: Exam Cheat Sheet

For ALL Analysis Videos, visit - patreon.com/sthithapragna

Store logs of all S3 object write operations	Enable CloudTrail S3 data event logging	AWS CloudTrail
Ensure sensitive S3 data is encrypted and key access limited	Use SSE-KMS and restrict access with IAM + key policy	Amazon S3, AWS KMS
Petabytes of unpredictable S3 access patterns, must keep ms retrieval	Use S3 Intelligent-Tiering default tiers	Amazon S3
Enable Lambda to insert/update/delete in RDS private subnet	Run Lambda in same VPC, update DB SG for Lambda	AWS Lambda, Amazon RDS
Stream clickstream events to S3 with near-real-time buffering and compression	Use Firehose delivery stream with buffering + compression to S3	Amazon Kinesis Data Firehose
Build scalable consumer for high-throughput event stream with fine control	Use MSK (managed Kafka) and scale consumer groups	Amazon MSK
Join streaming orders with static reference data	Use Kinesis Data Analytics (SQL) with reference table in S3	Amazon Kinesis Data Analytics, Amazon S3
Ingest relational DB to S3 incrementally with minimal code	Use DMS full load + CDC to S3 in Parquet	AWS DMS, Amazon S3
Curate Bronze→Silver→Gold tables, ACID, schema evolution	Use Delta Lake/Apache Hudi on EMR with Glue Catalog	Amazon EMR, AWS Glue
Partition Athena tables by dt/region for faster queries	Create external tables with partition keys; use MSCK/Glue crawler	Amazon Athena, AWS Glue
Redshift COPY small files causes slow loads	Stage to S3 and COPY with MANIFEST after compaction	Amazon Redshift, Amazon S3
Enforce cell-level masking for a few PII columns across tools	Use Lake Formation column-level permissions and LF-tags	AWS Lake Formation
Trigger ETL when new file lands in S3	S3 event → EventBridge → Start Glue job	Amazon S3, Amazon EventBridge, AWS Glue

AWS DEA-Cor: Exam Cheat Sheet

For ALL available pdf's, visit - <https://tinyurl.com/buy-exam-pdf>

For ALL Analysis Videos, visit - patreon.com/sthithapragna

Centralize secrets for ETL connectors	Store in AWS Secrets Manager; reference from jobs	AWS Secrets Manager
Provide private access to a partner's API from VPC	Use PrivateLink (Interface VPC Endpoint)	AWS PrivateLink
Keep EMR cluster costs low for nightly batch	Use transient EMR on Spot with steps; auto-terminate	Amazon EMR
Optimize Glue Spark job shuffles on wide joins	Repartition by join keys, pushdown filters, use broadcast hints	AWS Glue
Share curated tables across accounts with governance	Lake Formation resource sharing + LF-tags	AWS Lake Formation
Search JSON logs at scale with dashboards	Ingest to OpenSearch via Firehose; index with mappings	Amazon OpenSearch Service, Amazon Kinesis Data Firehose
Orchestrate multi-step pipeline with retries and branches	Use Step Functions with Glue/EMR/Athena tasks	AWS Step Functions
Move millions of on-prem files to S3 quickly one-time	Use AWS Snowball (Edge) and import to S3	AWS Snowball, Amazon S3
Ongoing NFS to S3 sync with schedules	Use AWS DataSync with NFS source and S3 destination	AWS DataSync, Amazon S3
Access S3 privately from private subnets	Configure S3 Gateway VPC Endpoint and correct bucket policy	Amazon S3, VPC Endpoints
Redshift needs fresh dimension data from DynamoDB	Export DynamoDB to S3 (or Streams → Firehose) then COPY	Amazon DynamoDB, Amazon S3, Amazon Redshift
Cache frequently read reference data for low latency	Use ElastiCache (Redis/Memcached)	Amazon ElastiCache
Apply ML model predictions on streaming events	Use Kinesis Data Analytics with integrated Lambda/UDF or SageMaker endpoint	Amazon Kinesis Data Analytics, AWS Lambda, Amazon SageMaker
Encrypt data in transit between on-prem and AWS	Use TLS/SSL with Direct Connect or VPN	AWS Direct Connect, AWS Site-to-Site VPN
Redshift COPY needs creds rotation automatically	Store creds in Secrets Manager, IAM role access	AWS Secrets Manager, Amazon Redshift

AWS DEA-Cor: Exam Cheat Sheet

For ALL available pdf's, visit - <https://tinyurl.com/buy-exam-pdf>

For ALL Analysis Videos, visit - patreon.com/sthithapragna

Organize multi-team data lake permissions	Use Lake Formation with LF-tags and scoped grants	AWS Lake Formation
Ensure all new S3 objects are encrypted automatically	Enforce bucket default encryption and Config rule	Amazon S3, AWS Config
Process IoT sensor data stream into time-series queries	Use IoT Core → Kinesis Data Streams → Timestream	AWS IoT Core, Amazon Kinesis, Amazon Timestream
Track lineage and data quality for lake ingestion	Use AWS Glue Data Catalog + AWS Glue Data Quality + tags	AWS Glue
Keep Athena query results encrypted and limited access	Configure workgroup with SSE-KMS and restrict bucket	Amazon Athena, AWS KMS
Automate partition creation in Athena when new data lands	Use S3 event → Lambda → ALTER TABLE ADD PARTITION	Amazon S3, AWS Lambda, Amazon Athena
Join clickstream (stream) with user profile (batch)	Use Kinesis Data Analytics with reference S3 table	Amazon Kinesis Data Analytics
Automatically archive cold S3 data after 90 days	Lifecycle rule → Glacier Flexible/Deep Archive	Amazon S3 Glacier
Allow BI users to query lake without exposing raw PII	Use curated views + Lake Formation fine-grained grants	AWS Lake Formation
Ingest millions of small IoT files efficiently into Redshift	Compact files in S3 (Glue/EMR), then COPY	Amazon Redshift, AWS Glue, Amazon S3
Ensure Glue crawler has least-privilege access	Grant LF data location + S3 read/list on bucket	AWS Glue, AWS Lake Formation
Provide cross-account access to specific lake tables	Use Lake Formation resource shares with RAM	AWS Lake Formation
Detect and mask credit card numbers in ingested text	Use Amazon Comprehend PII detection or Macie for S3	Amazon Comprehend, Amazon Macie
Stream DB change logs into lake for analytics	Use DMS CDC → Kinesis/Firehose → S3	AWS DMS, Amazon Kinesis, Amazon S3
Load Redshift tables incrementally with upserts	Use MERGE with staging tables in Redshift	Amazon Redshift

AWS DEA-Cor: Exam Cheat Sheet

For ALL available pdf's, visit - <https://tinyurl.com/buy-exam-pdf>

For ALL Analysis Videos, visit - patreon.com/sthithapragna

Collect VPC flow logs centrally for analytics	Deliver to S3 via Flow Logs → Athena/OpenSearch	Amazon VPC Flow Logs, Amazon S3, Amazon Athena
Schedule daily ELT from S3 to Redshift with dependencies	Use Step Functions to orchestrate Glue/Athena transforms then Redshift COPY/SQL	AWS Step Functions, AWS Glue, Amazon Redshift
Control Redshift access by job function (analyst vs admin)	Use Redshift RBAC with roles and grants	Amazon Redshift
Enforce encryption for all buckets in the account	Create AWS Config rule and auto-remediate default encryption	AWS Config, Amazon S3
BI tool needs governed access to lakehouse tables	Expose via Lake Formation permissions and Athena workgroups	AWS Lake Formation, Amazon Athena
Cut EMR costs for ad-hoc Spark jobs	Use EMR Serverless; pay-per-execution	Amazon EMR Serverless
Keep Glue job code versioned and CI/CD-enabled	Store in CodeCommit/GitHub; deploy via CodePipeline	AWS CodeCommit/GitHub, AWS CodePipeline, AWS Glue
Partner needs read-only access to curated S3 folder	Bucket policy scoped to prefix; optional S3 Access Points	Amazon S3
Detect schema drift in incoming JSON	Use Glue Schema Registry with compatibility checks	AWS Glue Schema Registry
Provide JDBC access to lake tables without managing clusters	Use Athena Federated/JDBC connector	Amazon Athena
Share Delta/Hudi tables across accounts/regions	Use Lake Formation or Delta Sharing; control with IAM/LF-tags	AWS Lake Formation
Keep PII masked in Athena/Presto queries	Use LF column-level permissions or views with masking	AWS Lake Formation, Amazon Athena
Incremental Parquet compaction for small files	Daily Glue job to repartition/compact by partition keys	AWS Glue

AWS DEA-Cor: Exam Cheat Sheet

For ALL Analysis Videos, visit - patreon.com/sthithapragna

Data scientists need isolated, auditable notebooks	Use SageMaker Studio domain with IAM + VPC controls	Amazon SageMaker
Persist feature sets for model training and online serving	Use SageMaker Feature Store (offline S3, online low-latency)	Amazon SageMaker Feature Store
Stream CDC from RDS to Redshift with minimal code	DMS CDC → S3/Redshift target	AWS DMS, Amazon Redshift
Build low-latency search over log data	Ingest via Firehose; index in OpenSearch with ILM	Amazon Kinesis Data Firehose, Amazon OpenSearch Service
Trigger downstream job after EMR step completes	CloudWatch Events/EventBridge rule on step state → invoke next job	Amazon EventBridge, Amazon EMR
Enforce per-team cost visibility on shared lake	Tag resources; use Cost Allocation Tags and CUR	AWS Cost Explorer, Cost and Usage Report
Serve parquet tables to external SQL Server users	Use Athena + ODBC/JDBC; restrict via Lake Formation	Amazon Athena, AWS Lake Formation
Keep private S3 access from on-prem without public internet	Use Site-to-Site VPN/Direct Connect + S3 PrivateLink (Gateway endpoint for VPC)	AWS Site-to-Site VPN / Direct Connect, AWS PrivateLink, Amazon S3
Detect sensitive data patterns across all S3 buckets	Use Amazon Macie automated discovery across accounts	Amazon Macie
Load batch CSV data from S3 to Redshift daily	Use Redshift COPY from S3 with manifest; schedule via EventBridge	Amazon Redshift, Amazon S3, Amazon EventBridge
Ensure Glue jobs don't exceed budget	Define budgets/alerts in AWS Budgets; monitor via CloudWatch metrics	AWS Budgets, Amazon CloudWatch
Archive regulatory logs for 7+ years with compliance	Use S3 Object Lock compliance mode + Glacier Deep Archive	Amazon S3 Glacier, Amazon S3
Orchestrate ML pipeline from raw data → training → deploy	Step Functions with SageMaker Processing/Training/Deploy steps	AWS Step Functions, Amazon SageMaker
Access DynamoDB data from Spark jobs	Use Glue/Spark DynamoDB connector	AWS Glue, Amazon DynamoDB

AWS DEA-Cor: Exam Cheat Sheet

For ALL available pdf's, visit - <https://tinyurl.com/buy-exam-pdf>

For ALL Analysis Videos, visit - patreon.com/sthithapragna

BI queries must be cost-controlled and audited	Use Athena workgroups with query limits + CloudTrail	Amazon Athena, AWS CloudTrail
Secure partner data exchange into S3 with per-partner folders	S3 bucket policies scoped by prefix + IAM roles	Amazon S3, AWS IAM
Speed up queries on terabytes in S3 with predictable filters	Use partitioned Parquet + Athena partition pruning	Amazon Athena, Amazon S3
Detect unexpected schema changes in event streams	Use Glue Schema Registry with compatibility checks	AWS Glue
Provide centralized catalog for cross-account analytics	Use AWS Glue Data Catalog + Lake Formation sharing	AWS Glue, AWS Lake Formation
Redshift query concurrency bottlenecks with many users	Use Concurrency Scaling clusters or Spectrum offload	Amazon Redshift
Stream web events, transform JSON, and store as Parquet	Use Firehose with Lambda transformation → S3 Parquet	Amazon Kinesis Data Firehose, AWS Lambda, Amazon S3
Ensure EMR notebooks and clusters use encryption everywhere	Configure EMR security config: TLS in transit, KMS at rest	Amazon EMR, AWS KMS
Provide external auditors access to specific datasets	Create Athena views; share via Lake Formation with fine-grained grants	Amazon Athena, AWS Lake Formation
Reuse Redshift queries in pipelines	Store as Redshift Stored Procedures and schedule via EventBridge	Amazon Redshift, Amazon EventBridge
Keep cost low for rarely used Glue jobs	Use Glue on-demand jobs, stop DPU's when idle	AWS Glue
Detect personally identifiable data in free-text	Use Comprehend PII API for text; Macie for S3	Amazon Comprehend, Amazon Macie
Persist machine learning features for batch + online serving	Use SageMaker Feature Store (offline S3, online low-latency DB)	Amazon SageMaker Feature Store
Share curated S3 datasets with other accounts securely	Use S3 bucket policies or Lake Formation resource sharing	Amazon S3, AWS Lake Formation

AWS DEA-Cor: Exam Cheat Sheet

For ALL available pdf's, visit - <https://tinyurl.com/buy-exam-pdf>

For ALL Analysis Videos, visit - patreon.com/sthithapragna

Encrypt all data stored in Redshift transparently	Enable Redshift cluster encryption with KMS CMK	Amazon Redshift, AWS KMS
Need near real-time metrics on streaming orders	Use Kinesis Data Analytics with tumbling windows	Amazon Kinesis Data Analytics
Detect and quarantine bad records in Glue jobs	Use Glue Data Quality with rules; send failures to quarantine S3	AWS Glue
Analyze multi-structured log data without ETL	Use Athena on S3 (partition + schema-on-read)	Amazon Athena, Amazon S3
Handle unpredictable query workloads in Redshift	Use Concurrency Scaling + Spectrum for overflow	Amazon Redshift
Replace FTP for daily file exchange with secure transfer	Use AWS Transfer Family (SFTP/FTPS/FTP) to S3	AWS Transfer Family, Amazon S3
Build dashboards over streaming IoT metrics	Stream → Firehose → OpenSearch → Kibana	Amazon Kinesis, Amazon OpenSearch Service
Fine-grained access for SQL queries on S3	Use Lake Formation LF-tags and row/column filtering	AWS Lake Formation
Retain clickstream raw data cheaply for years	Transition S3 data to Glacier Deep Archive	Amazon S3 Glacier
Control Glue job credentials securely	Use IAM roles + Secrets Manager for passwords	AWS Glue, AWS Secrets Manager
Need self-service analytics without exposing raw PII	Use curated Athena views + LF permissions	Amazon Athena, AWS Lake Formation
Detect schema evolution in Kafka events	Use Glue Schema Registry with versioning	AWS Glue Schema Registry
Enable SQL-based exploration of streaming data	Use Kinesis Data Analytics (SQL/Apache Flink)	Amazon Kinesis Data Analytics
Minimize cost of storing infrequently used backups	Lifecycle rules to Glacier Instant/Deep Archive	Amazon S3 Glacier
Share Redshift analytics with BI tools	Use Redshift Spectrum + workgroups	Amazon Redshift

AWS DEA-Cor: Exam Cheat Sheet

For ALL available pdf's, visit - <https://tinyurl.com/buy-exam-pdf>

For ALL Analysis Videos, visit - patreon.com/sthithapragna

Guarantee pipeline retries and error handling	Step Functions with retry policies + DLQ	AWS Step Functions
Move on-prem DB data to S3 securely ongoing	Use DMS full load + CDC with TLS/KMS	AWS DMS, Amazon S3
Provide API endpoint for curated S3 dataset	Use API Gateway + Lambda to serve data	Amazon API Gateway, AWS Lambda, Amazon S3
Enable near-real-time fraud detection from stream	Kinesis Data Streams + Lambda + DynamoDB for state	Amazon Kinesis Data Streams, AWS Lambda, Amazon DynamoDB
Restrict access to only last 30 days of logs	Use Athena views or LF row filters with date column	Amazon Athena, AWS Lake Formation
Keep raw, curated, and analytics layers in lake	Organize S3 into Bronze/Silver/Gold and enforce via LF-tags	Amazon S3, AWS Lake Formation
Provide data scientists ephemeral compute for PySpark	Use EMR Serverless or Glue interactive sessions	Amazon EMR, AWS Glue
Enforce encryption and retention for compliance logs	Use S3 Object Lock + SSE-KMS	Amazon S3, AWS KMS
Stream transactional DB changes into analytics lake	Use DMS CDC → Kinesis Firehose → S3	AWS DMS, Amazon Kinesis, Amazon S3
BI users need query isolation in Redshift	Use Workload Management (WLM) queues	Amazon Redshift
Detect anomalies in streaming IoT metrics	Use Kinesis Data Analytics with RANDOM_CUT_FOREST	Amazon Kinesis Data Analytics
Share datasets across org with governance	Use Lake Formation cross-account resource sharing	AWS Lake Formation
Minimize Glue ETL costs for nightly jobs	Use job bookmarks, auto-scaling DPU's	AWS Glue
Must redact SSNs before giving data to external teams	Use Lambda in S3 Object Lambda Access Points	Amazon S3, AWS Lambda
Maintain schema history across Kafka topics	Use Glue Schema Registry	AWS Glue

AWS DEA-Cor: Exam Cheat Sheet

For ALL Analysis Videos, visit - patreon.com/sthithapragna

Build real-time dashboards for logs	Deliver via Firehose → OpenSearch → Kibana	Amazon Kinesis Firehose, Amazon OpenSearch
Ensure cross-region DR for Redshift cluster	Enable automated snapshots with cross-region copy	Amazon Redshift
Archive old partitions automatically	S3 Lifecycle to Glacier storage classes	Amazon S3, Amazon S3 Glacier
Give ML engineers sandbox access without impacting prod	Use isolated SageMaker Studio domains/projects	Amazon SageMaker
Identify exposed keys in S3	Use Macie to scan for credentials	Amazon Macie
Query petabyte-scale lake with ANSI SQL	Use Amazon Athena on partitioned Parquet	Amazon Athena
Enforce per-country access for analysts	Use Lake Formation row-level security with country column	AWS Lake Formation
Maintain low-latency ingestion for billions of events	Use Kinesis Data Streams with enhanced fan-out	Amazon Kinesis Data Streams
Guarantee ordered processing of streaming transactions	Use Kinesis Data Streams with partition key = transaction ID	Amazon Kinesis Data Streams
Centralize security/compliance docs for auditors	Download from AWS Artifact	AWS Artifact
Securely share business reports with external auditors	Use S3 pre-signed URLs with expiration	Amazon S3
Provide automated failover for multi-AZ RDS	Enable Multi-AZ deployment	Amazon RDS
Detect unexpected public S3 buckets	Use AWS Config rules and remediate with SCPs	AWS Config
Give data scientists access to Spark without ops overhead	Use EMR Serverless	Amazon EMR Serverless
Store and query IoT time-series data efficiently	Use Amazon Timestream	Amazon Timestream

AWS DEA-Cor: Exam Cheat Sheet

For ALL available pdf's, visit - <https://tinyurl.com/buy-exam-pdf>

For ALL Analysis Videos, visit - patreon.com/sthithapragna

Automate schema discovery on JSON arriving in S3	Use Glue crawlers	AWS Glue
Track all object-level access in S3 with username	Enable CloudTrail data events for S3	AWS CloudTrail
Redshift needs workload separation for ELT vs BI queries	Configure separate WLM queues	Amazon Redshift
Must automatically redact PII before analytics	Use Macie detection → trigger Lambda to mask	Amazon Macie, AWS Lambda
Optimize batch job costs for infrequent workloads	Use transient EMR clusters with Spot instances	Amazon EMR
Enable SQL access to S3 + on-prem Oracle together	Use Athena federated query connector for Oracle	Amazon Athena
Automate partition addition for Glue/Athena tables	Lambda triggered by S3 event → ALTER TABLE	AWS Lambda, Amazon Athena
Centralize metadata catalog across regions	Use Glue Data Catalog with cross-region sharing	AWS Glue
Detect anomalies in metrics without custom ML	Use CloudWatch Anomaly Detection	Amazon CloudWatch
Control access to DB creds in Lambda functions	Store creds in Secrets Manager and access with IAM	AWS Secrets Manager, AWS Lambda
Encrypt DynamoDB data at rest with CMK	Enable DynamoDB SSE-KMS with CMK	Amazon DynamoDB, AWS KMS
Ensure S3 access logs are immutable	Store in S3 with Object Lock compliance mode	Amazon S3
Ingest Oracle tables daily into S3 Parquet	Use DMS ongoing replication to S3 Parquet	AWS DMS, Amazon S3
Automate data lineage tracking in ETL	Use Glue Data Catalog with lineage + tags	AWS Glue
Enforce that only encrypted connections access RDS	Enable “require SSL” parameter + enforce in SG	Amazon RDS

AWS DEA-Cor: Exam Cheat Sheet

For ALL available pdf's, visit - <https://tinyurl.com/buy-exam-pdf>

For ALL Analysis Videos, visit - patreon.com/sthithapragna

Share curated datasets with other AWS accounts securely	Use Lake Formation cross-account resource sharing	AWS Lake Formation
Provide near-real-time dashboards from IoT device data	Use Kinesis Data Streams → Firehose → OpenSearch → Kibana	Amazon Kinesis, Amazon OpenSearch Service
Ensure all Glue jobs use encryption at rest and in transit	Enable SSE-KMS and TLS; configure in job security settings	AWS Glue, AWS KMS
Detect PII across S3 and alert security team	Use Amazon Macie with Security Hub integration	Amazon Macie, AWS Security Hub
Migrate petabytes of data to AWS within weeks	Use AWS Snowball Edge or Snowmobile	AWS Snowball, AWS Snowmobile
Keep Redshift snapshots for 7 years with compliance	Use automated snapshots + S3 Object Lock in compliance mode	Amazon Redshift, Amazon S3
Restrict Athena queries by team	Use Athena workgroups with enforced limits	Amazon Athena
Centralize audit logs for all AWS accounts	Use CloudTrail organization trail to S3 + CloudWatch	AWS CloudTrail
Guarantee retries and alerts for failed ETL jobs	Use Step Functions with retry policies + DLQ	AWS Step Functions
Provide RDS read scalability for reporting	Use RDS Read Replicas	Amazon RDS
Store and serve features for ML models consistently	Use SageMaker Feature Store	Amazon SageMaker Feature Store
Analyze logs with dashboards without managing infra	Use CloudWatch Logs Insights + CloudWatch Dashboards	Amazon CloudWatch
Ensure DB migration continues after network outages	Use DMS with ongoing replication + cached transactions	AWS DMS
Secure Redshift credentials for BI tool connections	Store in Secrets Manager and reference in BI connector	AWS Secrets Manager, Amazon Redshift
Detect cost anomalies automatically	Use AWS Cost Anomaly Detection	AWS Cost Anomaly Detection

AWS DEA-Cor: Exam Cheat Sheet

For ALL available pdf's, visit - <https://tinyurl.com/buy-exam-pdf>

For ALL Analysis Videos, visit - patreon.com/sthithapragna

Enforce VPC-only access to S3 buckets	Use VPC Endpoint policies with bucket condition	Amazon S3, VPC Endpoints
Provide isolated Spark clusters for each team	Use EMR with per-team clusters or EMR Studio	Amazon EMR
Allow querying of JSON logs stored in S3	Create external schema and use Redshift Spectrum	Amazon Redshift Spectrum
Ingest streaming events into Delta Lake with ACID	Use Spark Structured Streaming with Delta sink	Apache Spark (EMR/Glue)
Detect personally identifiable text during ETL	Use Amazon Comprehend PII detection API	Amazon Comprehend
Provide BI users sub-second queries on curated data	Load data into Redshift with sort/dist keys	Amazon Redshift
Guarantee schema consistency across multiple Kinesis producers	Use Glue Schema Registry with compatibility checks	AWS Glue Schema Registry
Store infrequently accessed data at lowest cost but ms latency	Use S3 Intelligent-Tiering	Amazon S3
Detect anomalies in billing automatically	Use Cost Anomaly Detection + CloudWatch Alarms	AWS Cost Anomaly Detection, Amazon CloudWatch
Secure API keys and rotate automatically for apps	Store in Secrets Manager, enable rotation	AWS Secrets Manager
Enforce encryption for new S3 buckets in all accounts	Use SCP or Config rule for default SSE-KMS	AWS Organizations SCP, AWS Config
Serve SQL queries across PostgreSQL + S3 lake	Use Athena federated query connector	Amazon Athena
Ensure cross-account data access is audited	Enable CloudTrail and Lake Formation permissions	AWS CloudTrail, AWS Lake Formation
Redact PII dynamically in S3 responses	Use S3 Object Lambda with Lambda function	Amazon S3, AWS Lambda
Detect drift in Glue job schemas	Use Glue Data Quality or Schema Registry	AWS Glue

AWS DEA-Cor: Exam Cheat Sheet

For ALL available pdf's, visit - <https://tinyurl.com/buy-exam-pdf>

For ALL Analysis Videos, visit - patreon.com/sthithapragna

Centralize compliance evidence for auditors	Use AWS Artifact	AWS Artifact
Process IoT events with millisecond latency	Use Kinesis Data Streams with enhanced fan-out	Amazon Kinesis Data Streams
Archive DB backups long term with immutability	Export to S3 Glacier Deep Archive + Object Lock	Amazon S3 Glacier, Amazon S3
Guarantee DB failover across Regions	Use Aurora Global Database	Amazon Aurora
Provide external vendors restricted access to S3 data	Create IAM roles with S3 prefix-level policies	Amazon S3, AWS IAM
Minimize cost for unpredictable access patterns	Use S3 Intelligent-Tiering	Amazon S3
Mask PII columns in Athena queries	Use Lake Formation column-level permissions	AWS Lake Formation
Trigger ML pipeline when new data lands	S3 Event → EventBridge → SageMaker Pipeline	Amazon S3, Amazon EventBridge, Amazon SageMaker
Optimize Spark jobs for skewed joins	Use salting, repartitioning, broadcast hints	Apache Spark (EMR/Glue)
Provide real-time fraud detection with historical context	Stream via Kinesis, enrich with DynamoDB, detect via Lambda	Amazon Kinesis, Amazon DynamoDB, AWS Lambda
Group customers by purchase history for personalization	Use Clustering (unsupervised learning)	Amazon SageMaker (ML)
Control employee access to foundation models	Restrict discoverable FMs in SageMaker JumpStart	Amazon SageMaker
Evaluate accuracy of translation tool vs human	Use BLEU score (parallel data evaluation)	Amazon Translate, BLEU
Identify objects in customer-uploaded photos	Use Amazon Rekognition object detection	Amazon Rekognition
Deploy custom ML model securely for inference	Use SageMaker with VPC-only endpoints	Amazon SageMaker

AWS DEA-Cor: Exam Cheat Sheet

Automate labeling of medical images	Use SageMaker Ground Truth with labeling jobs	Amazon SageMaker Ground Truth
Detect fraudulent credit card transactions	Use Classification model	Amazon SageMaker
Generate product descriptions automatically	Use Foundation Models via Bedrock	Amazon Bedrock
Translate support tickets in real time	Use Amazon Translate real-time translation	Amazon Translate
Detect speech sentiment in call recordings	Use Amazon Transcribe + Amazon Comprehend	Amazon Transcribe, Amazon Comprehend
Provide governance/compliance over AI data	Use AWS Artifact + IAM controls	AWS Artifact, AWS IAM
Redact PII from documents before sharing	Use Amazon Comprehend for PII detection	Amazon Comprehend
Ensure model training data is encrypted at rest	Use SSE-KMS with S3 + SageMaker	Amazon S3, Amazon SageMaker, AWS KMS
Provide human-in-loop review for AI decisions	Use SageMaker A2I (Augmented AI)	Amazon SageMaker A2I
Detect anomalies in manufacturing sensor data	Use Random Cut Forest in Kinesis Analytics	Amazon Kinesis Data Analytics
Classify product reviews by sentiment	Use Comprehend Sentiment Analysis	Amazon Comprehend
Translate multi-language documents at scale	Use Amazon Translate batch jobs	Amazon Translate
Provide search over large text corpus	Use Amazon Kendra semantic search	Amazon Kendra
Secure access to models/data by region	Use IAM policies + SCPs	AWS IAM, AWS Organizations
Enforce responsible AI guidelines	Apply fairness, transparency, monitoring with SageMaker Clarify	Amazon SageMaker Clarify
